

## High School Team Wins 2<sup>nd</sup> in Programming Contest

Marlborough: Juniors Dan Warner, Tejas Rao, Jon Roche, and Josh Michel represented AMSA at the High School Programming Contest at Fitchburg State University on Dec. 6. AMSA placed second out of 42 teams.

The contest consisted of 12 problems. Each team was given three hours to solve as many problems as possible, with a single computer as the sole tool. They were expected to develop different programs to solve these problems.

For example, the AMSA team developed one program to find different bicycle-to-gear ratios.

Computer science teachers Kelly Powers and Lino Alvarez attended the tournament as AMSA coaches. Yearly, their students compete in similar computing events to improve and expand their skills.

**AMSA is not waiting for the world to change...we are changing the world one student at a time...every day. [www.amsacs.org](http://www.amsacs.org)**
