## **About K12 Mobility, Inc.**

K12 Mobility, Inc. has developed and deployed a way for K-12, Public, Charter and Magnet Schools to level the technology playing field using an equalizer. This equalizer is our platform called the Digital Learning Platform (DLP). It takes into consideration those most at-risk and helps to provide digital content via the 4G network of T-Mobile USA, (our national wireless K-12 partner). Although this platform has been launched in Indiana and Colorado, we are currently leveraging T-Mobile's team to launch this program nationwide. We are making sure Urban Schools have professional development, \$1 netbook and tablet devices as well as other things needed for a successful and sustainable 1:1 deployment.
